1. What design principles does this code violate?
2. Refactor the code to improve its design.

```
if (!((score > 700) ||
  ((income >= 40000) && (income <= 100000)
 && authorized && (score > 500)) ||
  (income > 100000)))
  reject();
else
  accept();
```
